DAYTON, Ohio, June 7, 1973 --- When the summer months come, all life and action at a university doesn't go on vacation. In fact, a campus can come alive during the summer as the scene of creativity, culture, activities, people, and, of course, learning. All this will make up the University of Dayton's Second Session of the 51st year of summer education at U.D., running June 18 to July 28, with registration on June 14 and 15.

Diversity describes the more than 170 undergraduate and 120 graduate, day and evening courses offered in 49 departments. Just as diverse are the reasons you'll find for taking a summer course. Many find summer the ideal time to add a necessary course or catch up on requirements, while others work toward an early education, or just take a workshop or class in a subject that interests them.

Provocative thinking and creativity are in store for those who enroll in one of the eighteen summer workshops. Two to three graduate or undergraduate semester credits can be earned in a condensed time period in Education, Performing and Visual Arts, Home Economics, and Business.

Undergraduate education workshops offered include a six week workshop on organizational and administrative aspects of Driver and Traffic Safety Education as they relate to the total school and other specialized programs. Three semester credits in Physical Education are also earned. A five day workshop on Dimensions of Individualized Instruction will serve as an in-service program to give practical help to the classroom teacher. It will be conducted by a team of teachers who have successfully developed individualized programs through the use of learning packages in Centerville, Ohio, and carries 2 semester credits in Secondary Education. Another Secondary Education workshop investigates how pre-service and in-service teachers can use a newspaper as a living textbook in elementary, junior and senior high curricula. Participants in the workshop will also learn the various jobs of newspaper personnel, and will take a field trip to a newspaper plant. The workshop, with limited enrollment, is co-sponsored by the Dayton Journal Herald.

A two-week workshop on Graphic Arts can add 2 credits in art as well as explore the graphic-multiple-image media, serigraphy, and relief printing, and provide practical studio experience with creative search sessions. The Department of Home Economics' Child Development Workshop will evaluate the growth of children through observation, activity and lectures, with case study and nursery school participation arranged. The two-week workshop also offers 3 credits.

Among the graduate workshops offered second session is "Conflict in the Classroom: the Education of Children with Problems." It aims to assist teachers, counselors and administrators to understand and improve their role as educators of "children in conflict." Consulting specialists will work with participants in exploring techniques, approaches, and school and community programs that respond to academic and personal needs of children with problems. The two week course can provide 2 graduate credits in Counselor Education, as well.

For the eleventh year, the very popular three week workshop will be held in "Business Systems and Data Processing: A Career Oriented Approach," specifically designed for business education teachers and administrators who seek familiarization with modern data processing concepts, techniques, and equipment. A business education career-oriented approach with secondary school applicability will be emphasized. It is an Ohio Intensive Office Education Qualifying Workshop, co-sponsored by the Department of Education, State of Ohio. Lectures, discussions, demonstrations, field trips and practice sessions will include prominent authorities from guidance, education systems, and data processing.

A totally different type of workshop is the two week "Cultural Enrichment Through Study Abroad" program for teachers and administrators, and those who might derive benefits on a non-credit basis. Participants will visit Rome, Athens, Beirut, Cairo, and areas around Israel and the Holy Land.

Still another type of innovative learning can be found in Special Sessions, offered without college credit and designed for one's personal benefit in business, social or private life, and open to any adult regardless of previous education. Among those in the 1973 Summer Program is a month-long course in Reading Improvement with individualized instruction for those wishing to improve speed and comprehension. A Pre-Med Study Program during two weeks in July will emphasize Chemical principles and Math preparation necessary for problem-solving in a college or pre-med or science program. For High School Students, a six week Actor's Workshop will be offered, covering role-playing, character analysis and dramatic movement.

Rounding out summer life on campus is a calendar of activities. Several Theology lectures will bring in such speakers as Archbishop Bernardin, Rev. Charles Curran, Hans Ruedi Wever, and Rev. Richard McBrien. In sports, there'll be intramural softball games, handicapped mixed bowling league meets, and summer sports league in softball, volleyball, and basketball.

Entertainment is promised in the three summer Theatre/Restaurants, to be held in the UD Arena Associates Lounge. This summer's schedule will present "Forty Carats" on June 28 and 29; "The Gingerbread Lady" on July 20 and 21; "The Roar of the Greasepaint, the Smell of the Crowd" on August 16 and 17.

People are what make the programs and life on campus go. Each person attending U.D. for the summer has an interesting story to tell. Abdulkarim Hamadi is taking a summer course towards fulfilling requirements for a Master of Arts Degree in Political Science. A citizen of Saudi Arabia, Abdul plans to use his education while working in the Ministry of Foreign Affairs in the Saudia Arabian Government. (Saudia Arabia is just one of fourteen nations represented at U.D. during the summer session.)

Deborah Iaione is a junior at U.D. majoring in Elementary Education, and is spending her summer in Europe earning credits through U.D.'s Interdepartment Summer Study Abroad Program.

Jerry Garrison, a 1966 graduate of Morehead State University and now a driving teacher in the Fairborn School District, is taking the Driver Education Workshop.

Nathan Feldman, a student at New Mexico Institute of Mining and Technology, has decided to travel from his home in Fremont, New Hampshire to a field station in upper Michigan, where he will attend a 3 week summer geology course, also part of U.D.'s extensive summer program.

Maria Bole has just graduated from Julianne High School in Dayton and has decided to enroll in a history course at U.D. in order to gain an initial exposure to the college environment.

The University of Dayton caters to individual needs and interests during the summer session. Adults, former and present college students, teachers, high school seniors, everyone can add to the life and learning of the U.D. campus this summer. Registration is Thursday June 14 from 6:00 P.M. to 7:30 P.M. and June 15 from 9:00 A.M. to 11:30 A.M. For information call 229-4141.
